

FIELD SPORTS

- Customers can specify the addition of a bulkhead storage area with external access doors.
- Mesh doors can be fitted for transporting dogs.

ACCESSORIES

Paint work and sign writing can be arranged along with other accessories such as public address systems, internal lighting, etc.

ONE OFF MODELS

Access Trailers have one of the most comprehensive ranges of passenger carrying trailers in the country however we can also design and build "one off" models to meet your individual requirements.

Our trailers provide a useful base for other applications such as mobile classrooms, mess rooms, wildlife hides, exhibition areas etc.

ACCESS TRAILERS™

Access Trailers are designed to carry people and have a wide variety of uses such as farm and estate tours, field sports, country/leisure parks etc.

- The trailers can offer a new attraction as well as providing an opportunity to generate extra income.
- Low running costs, short pay back period and easy to maintain they can be pulled by either a suitable 4x4 or tractor.
- Our units are hand built with a fully galvanised chassis, superstructure and alloy sheet sides.
- Access Trailers are the result of a design and manufacture collaboration between Minibus Options, a leading UK constructor of minibuses and Graham Edwards Trailers, who are well known in the agricultural world for their livestock and transport trailers.

SPECIFIC FEATURES

- Good access for young and old, with low floor height incorporating easy to use fold out steps.
- Twin safety handrails adjacent to steps.
- Variety of seating options and layouts ranging from 12 to 30+ seats.

SEATING

- Easy to maintain seating fitted to a galvanised steel frame and bolted directly through the floor into the trailer chassis.
- Individual 'lap type seat' belts are available.
- Under seat storage area.

WEATHER PROTECTION

- Full length fixed translucent fibreglass roof provides an internal height of 2m (6'6").
- See through roll-up screen fitted to front bulkhead.
- Additional side/rear curtains with integral plastic windows are available.

TRAILER SPECIFICATION

The trailers are built on a twin axle 3500kg platform trailer with 0.92m (3') high sides. Triple axles are standard on the 6m (20') and 6.6m (22') models.

A single opening door is fitted at the rear with a restraint to hold at 90° when open.

All trailers have a galvanised chassis with fully independent suspension with overrun, auto reversing brakes. The hitch is hydraulically dampened with a 50mm ball (or agricultural hitch) with lockable cast coupling and power assisted handbrake. Standard equipment includes; phenol coated plywood floor, telescopic jockey wheel and full road lights.

Trailers are available in a variety of lengths from 3m (12') to 6.6m (22'). The standard width is 2.3m (7'6") or 2m (6'6") on smaller units.

TRACTOR DRAWN TRAILERS

- Seating layouts are available on a fixed draw bar agricultural chassis with hydraulic brakes.
- Potentially greater carrying capacity (up to 40+ passengers).
- Higher ground clearance.

WHEELCHAIR PACK

If required our trailers can be fitted with an option pack for carrying wheelchair users.

- Depending on the model the pack includes either a fitted folding wheelchair ramp or electric lift.
- Comes complete with clamps or chair restraints which lock into floor mounted tracking.
- Wheelchair occupant belts and removable seat fittings are supplied as required.
- Equipment for wheelchair users can be viewed by appointment.
