Perfection in Permanent Cosmetics

Perfectly Shaped Brows
Fuller Looking Lips
Smudge Resistant Eyeliner

Imagine the convenience of having perfectly applied make-up that stays in place all day, everyday.

Brows

Eyes

Lips

*Always remaining
Beautiful,
Convenient and Forever.*

Reasons Why?

- *Insufficient/no eyebrows/eyelashes*
- *Poor vision or unsteady hand*
- *Allergies to conventional make-up*
- *Professionals with little time*
- *Alopecia and cancer sufferers*
- *Hayfever/watery eyes*
- *Swimming/sports enthusiasts*
- *Correction of asymmetrical lip/brow features*

More and more people are discovering the advantages of using permanent cosmetics, not only for their appearance but also because it suits their lifestyle. Both men and women alike could benefit for a different array of reasons. Not only can it restore confidence and self esteem for clients that have undergone major trauma, it can also prevent unnecessary embarrassment of wiping off pencil lines throughout the day.

What happens?

During treatment carefully applied non toxic, hypo allergenic micro pigments are placed into the upper most dermal layer of the skin using sterile 'single use' needle cartridges. Every precaution is taken to minimise discomfort for the client and to help with this topical anaesthetics are applied before and during the procedure. Depending on individual pain thresholds/procedure performed, some clients report a scratchy/tickly sensation, with the majority feeling hardly anything at all.

Treatments Available

Before

After

Eyebrow Contours

Eyebrows that are too light, too thin, sparse or non-existent can be beautifully enhanced by using either a bold block brow effect or the latest 3D hair stroke effect. Eyebrow enhancement frames the face and can give an instant eye lift with surgery, making you look ten years younger.

Eye Contours

Eyeliner enhances and defines the beauty of the eyes and is suitable for male and female clients. It makes the lashes appear naturally thicker and you can choose the effect you prefer; soft, subtle or smoky-it's your choice.

Lip Contours

Lip colour is perfect for asymmetrical shaped, thick, thin or cleft lips. It can restore lost definition and eliminate the problem of lipstick 'bleeding' into the fine lines around the mouth.

Health and Safety

“Safety is paramount and only the strictest hygiene and sterilisation standards should be followed”

Premises

The premises and all equipment used, has been fully inspected by the environmental executives and comply with all Health and Safety requirements.

Equipment

The latest Nouveau Contour digital Intelligent machine is used incorporating a hand piece that can deliver the highest levels of safety and precision. Due to the patented safety system only sterile 'single use' needle cartridges can be used (individual packaging is opened and disposed of in front of the client at the start and end of each procedure), this along with protective barrier film gives the guarantee of eliminating any risk of cross contamination.

Pigments

Only the highest grade of micro pigments are used, all of which are made from natural minerals. Due to their safe non toxic, hypo allergenic properties they are even considered beneficial for clients that have intolerances to conventional cosmetics.

Documentation

All relevant training certificates and licences are held along with comprehensive liability/risk insurance underwritten by Holistic Insurance Ltd.
