

Why wait up to 18 months for your share of the ROC recycle pot?

- NFPAS Auctions have been running on-line auctions for ROCs since 2002 selling almost 4.5 million ROCs over the period. Recently volumes sold through the auction have increased with sellers able to turn their ROCs quickly into cash soon after the monthly issue of ROCs by Ofgem.
- Sellers have stated that they like the certainty of a full price from the auction rather than the wait and uncertainty of the recycle fund. In fact some payments from this recycle fund are a full 18 months from generation.
- NFPAS have already had two auctions during CP9 and in the last auction in October the average price for CP9 ROCs was £46.92 , very close to the maximum prices for CP9 ROCs currently forecasted by industry specialists Cornwall Energy.
- Please see the graph attached which clearly shows the benefits of the certainty and increased cash flow of selling your ROCS through the NFPAS Auction.
- The dates of the next auctions will be Thursday 25th November and Wednesday 22nd December.

For further details of our e-ROC auction, contact us at: info@nfpas.co.uk ring on: 0191 245 7330 or click on: www.nfpas-auctions.co.uk

For more information on Cornwall Energy's ROC value forecasts please call Ben Hall on (01692 407865) or email: ben@cornwallenergy.com

The dates of the next auctions will be Thursday 25th November and Wednesday 22nd December

NFPAS Auctions also run on-line auctions for the sale of renewable electricity (e-POWER) and Renewable Transport Fuel Certificates (e-TOC).
