...or even more!

Which is why we developed **4MAT 4 Algebra**, a unique teaching system that enables teachers to deliver lessons that virtually all of their students relate to and understand.

The key to the success of **4MAT 4 Algebra** is a conceptual approach that engages students through interactive lessons, showing them how Algebra fits in their everyday lives. The bottom line is, they are able to focus better, retain more and earn better grades.

4MAT[®] 4 Algebra

An abstract, painterly background featuring a mix of green, yellow, and blue hues. Overlaid on this are various mathematical symbols and letters in different colors and sizes, including a large purple 'M', a purple question mark, a purple 'C', a purple 'G', and a purple 'A'. A faint, close-up image of a person's face is visible on the right side of the background.

4MAT 4 Algebra students will no longer complain about their work.

Because it is based on a series of overarching concepts that help student's find it more meaningful. It's about alternatives and comparisons and relationships. Ideas they can grasp and use and put to use.

These simple ideas form the basis for more meaningful and engaging approaches to communicating complex mathematical ideas.
