## Rabbi's Message

### Swine Flu

The swine flu is spreading. The most basic method of prevention is to always wash your hands.

Since Biblical times, hand washing has been an integral part of Jewish life. We wash our hands upon waking up in the morning, before eating Challah, after leaving the cemetery, and the list goes on.

Think about your hands – these are the only part of our bodies that reaches above our head as well as below our feet. In a spiritual sense – hands can do good and uplift us, and they can lower us to the lowest standards.

Let's make sure our hands are "clean"!
